

Date of 31/07/2019

Fund description

The objective of the fund is to achieve substantial capital appreciation by trading in the global currencies (FX) market. The fund will look to take advantage of both tactical (shorter term and based on momentum and key support / resistance levels) and fundamental opportunities (longer term and based on fundamentals and the macroeconomic environment) to create value for investors. The main vehicles used are FX spot and forward trades, options (both plain vanilla and exotic) and, to a lesser extent, structured products.

Selling restrictions

Where units are distributed outside Liechtenstein, the pertinent provisions in the respective country shall apply. The units have not been registered under the United States Securities Act 1933. With regard to distribution in the United States or to US citizens or persons resident in the United States, the restrictions detailed in the prospectus shall apply.

Further information

A gain in value in the past – even if this corresponds to a longer time period – provides no guarantee of positive performance in the future. Especially, this applies when the shown performance is less than 12 months. The risk of price and foreign currency losses and of fluctuations in return as a result of unfavorable exchange rate movements cannot be ruled out.

Performance rebased since inception

A performance graph will be shown after more data is available.

| Volatility | - |
| Sharpe Ratio | - |
| Maximum Drawdown | - |

Risk description

Since most assets of the sub-fund are invested in the forex asset class, the sub-fund is subject to increased currency risk. The specific investment type is additionally subject to a higher level of interest rate risk which may have negative effects on net assets of the sub-fund. The sub-fund may invest in derivatives as part of its investment strategy and may create leverage up to a multiple of the sub-fund's net assets.
