

Fund Description

The investment objective of the sub-fund is to achieve substantial capital appreciation by trading primarily in the Asian equity, fixed income, structured products and FX markets.

The SGMC Capital Fund - SGMC Asia Opportunities Fund looks to take advantage of both tactical (shorter term and based on momentum and key support /resistance levels) and fundamental opportunities (longer term and based on fundamentals and the macroeconomic environment) primarily in the Asian equity, fixed income, structured products and FX markets to generate returns.

The sub-fund may use different approaches which includes, beyond others, the investment into equities as well as derivative financial instruments.

Performance rebased since inception

The calculation of the charts follows the BVI method and thus the time-weighted approach that is customary for mutual funds

Risk description

Since most assets of the sub-fund are invested in the equity asset class, the sub-fund is subject to market risk, issuer risk and interest rate risk, which may have negative effects on net assets. Due to its regional focus, the sub-fund is subject to increased risks associated with the Asian region and may suffer from reduced benefits of regional diversification. The sub-fund may invest in derivatives and take out loans, which may create leverage up to a multiple of the sub-fund's net assets.

Further information

Investors should be aware of the fact that the value of investments can decrease as well as increase. Therefore, a positive performance in the past - even if it relates to longer periods - is no reliable indicator of a positive performance in the future. The risk of price and foreign currency losses and of fluctuations in return as a result of unfavorable exchange rate movements cannot be ruled out. There is a risk that investors will not receive back the full amount they originally invested. Forecasts are not a reliable indicator of future performance.

The commissions and costs charged on the issue and redemption of units are charged individually to the investor and are therefore not reflected in the performance shown.
